DENZA

ABOUT DENZA

DENZA was founded in 2010. At the beginning of its establishment, it adhered to the strategic positioning of only providing new energy luxury cars, always sharing and co-creating with users, and creating a smart and safe new luxury car brand that creates sensory value for users.

With fourteen years of development, DENZA has been actively enterprising, injecting strength and confidence into its products and actions. 2022, DENZA launched the D9, N7, N8 and other models, committed to bringing the new luxury and full-optimized travel experience to users around the world, and opening up a "new world of potential" for new energy luxury vehicles.

About Li Auto Inc.

Li Auto Inc. is a leader in China's new energy vehicle market. The Company designs, develops, manufactures, and sells premium smart electric vehicles. Its mission is: Create a Mobile Home, Create Happiness (创造移动的家, 创造幸福的家). Through innovations in product, technology, and business model, the Company provides families with safe, convenient, and comfortable products and services. Li Auto is a pioneer in successfully commercializing extended-range electric vehicles in China. While firmly advancing along this technological route, it builds platforms for battery electric vehicles in parallel. The Company leverages technology to create value for users. It concentrates its in-house development efforts on proprietary range extension systems, innovative electric vehicle technologies, and smart vehicle solutions. The Company started volume production in November 2019. Its current model lineup includes a high-tech flagship family MPV, four Li L series extended-range electric SUVs, and two Li i series battery electric SUVs. The Company will continue to expand its product lineup to target a broader user base.

ABOUT XPENG

Founded in 2014, XPENG is a leading Chinese AI-driven mobility company that designs, develops, manufactures, and markets Smart EVs, catering to a growing base of tech-savvy consumers. With the rapid advancement of AI, XPENG aspires to become a global leader in AI mobility, with a mission to drive the Smart EV revolution through cutting-edge technology, shaping the future of mobility.

To enhance the customer experience, XPENG develops its full-stack advanced driver-assistance system (ADAS) technology and intelligent in-car operating system in-house, along with core vehicle systems such as the powertrain and electrical/electronic architecture (EEA). Headquartered in Guangzhou, China, XPENG also operates key offices in Beijing, Shanghai, Silicon Valley, and Amsterdam. Its Smart EVs are primarily manufactured at its facilities in Zhaoqing and Guangzhou, Guangdong province.

CHANGAN Automobile is one of the four major Chinese automobile groups, with 44 years of car manufacturing experience, we have 21 manufacturing bases and 76 plants worldwide. As a leading Chinese car manufacturer, CHANGAN Automobile has self-owned brands including CHANGAN UNI, CHANGAN NEVO, CHANGAN LCV, DEEPAL, AVATR, and joint venture brands including CHANGAN Ford, CHANGAN Mazda, and JMC. In 2021, the cumulative sales of CHANGAN's self-owned brand exceeded 20 million units. Up till April 2024, the cumulative sales of Chinese brands under CHANGAN exceeded 26.33 million units. On December 10, 2025, China Changan Automobile Group 30 Millionth Vehicle Roll-Off Ceremony was held in Chongqing.

CHANGAN Automobile has more than 18,000 engineers and technicians from 31 countries around the world, and has established R&D network of ten cities in six countries in Chongqing, Beijing, Shanghai, Dingzhou in Hebei, Hefei in Anhui, Turin in Italy, Yokohama in Japan, Birmingham in the UK, Detroit in the US and Munich in Germany. We have a professional automotive R&D process and testing & verification system, to ensure that each product can endure more than 10 years or 260,000 km of use.

In 2017, CHANGAN Automobile launched its "The Third Business Venture — Innovation & Entrepreneurship Program" to build culture, efficiency and software capabilities as core competencies, and transformation towards an intelligent low-carbon mobility technology company.

CHANGAN, Smart your future.

About Wuling EVs

Wuling EVs are popular, affordable, compact electric vehicles from China's SAIC-GM-Wuling joint venture, known globally for models like the Hongguang MINI EV and Air ev, offering economical, zero-emission urban transport with tech-focused, safe battery systems and practical designs for growing markets like Nigeria and Indonesia. They focus on high cost-performance, featuring smart batteries, advanced safety, and user-friendly tech, making them strong contenders in the affordable EV segment worldwide.

About **Toyota Motor Corporation**

Toyota Motor Corporation is a global leader in vehicle electrification, offering a "multi-pathway" approach that includes hybrid (HEV), plug-in hybrid (PHEV), fuel cell (FCEV), and battery electric vehicles (BEV).

In Papua New Guinea (PNG), Toyota's products are distributed by Ela Motors PNG, a subsidiary of the Toyota Tsusho Group. Ela Motors currently focuses on providing Hybrid Electric Vehicles (HEVs) to the PNG market, such as the RAV4 Hybrid, with an aim to introduce broader electric solutions in the future.

ROX

About ROX Motor

ROX Motor is a new Chinese brand focused on rugged, luxury, all-terrain Extended-Range Electric Vehicles (EREVs), with its flagship model being the ROX 01; it combines electric power with a gas generator for long ranges (over 1,100 km), offering both city commuting and serious off-road capability with features like massive screens, premium interiors, and adventurous add-ons, targeting explorers who want EV benefits without range anxiety, as seen in its strong presence in markets like the Middle East.

About Volkswagen EV

Volkswagen's EV lineup, centered around the ID. series (like the popular ID.4 SUV), focuses on accessible, family-friendly electric mobility using their MEB platform, offering good range, tech (large touchscreens, digital cockpits), and user-friendly features like Plug&Charge, aiming to blend traditional VW quality with future EV tech and sustainability goals. They provide features like modular battery packs, 8-year battery warranties, and are expanding into new segments with concepts like the compact ID. Every1 for urban drivers.
